The students will learn about the culture of six different countries. They will learn about food, clothing, festivals, national symbols, folklore, weather, and much more. In order for the students to understand the unit, they need to be familiar with America. The students need to know enough basic facts about the United States of America in order to compare and contrast the other countries. By the end of the unit the students will be culturally aware and understand that being different and unique is not a bad thing, and that we should celebrate our differences.
